

County Councillor Report for March 2016

Acolaid planning application; a hydrological survey is being done as part of the submission of a detailed plan; it is important that this is carefully scrutinised, preferably with professional input.

Bus Service; as a result of representations which I made with support from local residents the service is being improved and buses will now run to Morganstown; the gap in service in the early morning has been reduced and buses **will** run at half hour intervals from 28th March

Nat West; they are running a service in Methodist carpark from 9.30 to 10.15 each Thursday.

Parking outside schools; there have been many complaints and the areas around our schools will be visited frequently by police, civil parking officers and the camera car. The white zigzags have been repainted and are clearly visible.

20mph zones: I have asked when these will be established around local schools as this is Welsh Government and Council policy.

Drains and potholes: I have reported some blocked drains and very many potholes, some very deep. I have pressed for resurfacing of the worst roads in the ward.

Youth Club; this is now running in OCR on a trial basis.

Station car park; no developments but I have supplied several residents with copies of the study.

Cardiff half marathon; this will be a very popular event on Saturday 26th March with Mo Farah running in it; plan carefully if you plan to go anywhere in Cardiff that day.

Double Yellow lines at bottom of Windsor Road; this request from Pact has now been implemented.

Surgery; My next surgery will be in Radyr library on Saturday 9th April between 10am and 12 noon

County Councillor Rod McKerlich, 15th March 2016
